ANNEXURE A

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Industry Perspective vis-à-vis Company

The Company operates primarily in the manufacture of Bulk Drugs and Real Estate Business.

FINANCE:

The gross revenue of the Company was ₹ 125.30 Crores for the year under review as compared to ₹ 147.16 Crores for the previous year ended on 31st March, 2017. The Company registered a net profit of ₹ 87.35 Crores as compared to net profit of ₹ 24.10 Crores for the previous year ended on 31st March, 2017.

OUTLOOK:

BULK DRUGS BUSINESS:

The Bulk Drugs Business of the Company could not perform satisfactorily, in spite of a good monthly-capacity enhancement and process-efficiency improvement achieved, primarily due to government's stringent pollution control-norms in the heart of the city, not allowing new product launch easily & stiff competition is faced from China, not enabling the company to plan long-term. However, the Company has successfully launched two new API-intermediates, during this year.

REAL ESTATE BUSINESS:

During the year, the Company recognized major portion of revenue on its real estate project, VEDA based on the percentage of completion method. The project is in its mid-stage of construction. The general outlook for the industry remains subdued due to sluggish demand.

OPPORTUNITY:

Within the given limitations, the bulk drug-division explored the possibility of manufacturing API-intermediates, for catering to the increasing demands of those products in the group companies.

The company decided to utilize the unused idle resources to generate additional-revenues from this (a) by developing & leasing out the excess premise and (b) by a resale of the available-sparable equipments, without compromising on the yearly budgeted plan.

With the implementation of Real Estate (Regulation and Development) Act, 2016, it is expected that competition from unorganized sector will be lower and the Company as a reputed corporate in compliance with law of land will be able to garner better market share.

Real Estate industry, at the macro level, expects to do better with falling interest rates. The Company has started construction on a commercial project with the objective of earning rental income.

CONCERN / RISK:

The Company continues to struggle in API business in spite of many initiatives in past few years. The business faces uncertain and bleak future, though the Company has made sincere efforts to

get a firm-foothold in API-intermediate business. But, it is not very successful in this exercise for two reasons: Chinese cheaper price in the market and the Company not having a GMP-conforming facility of that high standard which will satisfy synthetic regulatory API-customers, who are desirous of a long-term-association with the supplier.

THREAT:

The Company's business of Bulk Drugs is under pressure due to rigid, new & stringent pollution norms and secondly due to ever-increasing demands of capital upgradation, for the business development in an uncertain market and for the refurbishment of the manufacturing facility.

INTERNAL CONTROL SYSTEMS AND ADEQUACY:

The Company maintains a system of well-established policies and procedures for internal control of operations and activities.

The Company has appointed Internal Auditors for the Bulk Drugs division and Real Estate Division to ensure proper system of Internal Control and its adequacy.

The reports of Internal Auditors are presented on quarterly basis before the Audit Committee and their recommendations are implemented.

HUMAN RESOURCE INTERVENTION

Company has optimized the manpower to the right-size, so as to meet the new challenges of multi tasking and multi skilling. The management staff was given a professional & conducive atmosphere at the work-place.

HEALTH, SAFETY, SECURITY AND ENVIRONMENT

Health, Safety, Security and Environment is always looked at with its due seriousness along with our business-activities and all employees are adequately trained for taking up their individual accountability. Alembic's operations are well-resourced & they comply with all the required norms of Health, Safety, Security and Environment.

During the year under review, various safety audits were carried out by Independent consultants. Environmental audits (statutory) were also carried out and submitted to pollution control boards for their review.

Efforts are made at all levels to conserve energy and resources. Plantation programs were organized and special attention is provided to the Solvent Recovery Program.

Annexure “B” to the Independent Auditor’s Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of **ALEMBIC LIMITED** (“the Company”) as of March 31, 2018 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of internal financial controls with reference to financial statements of the Company that were operating effectively for ensuring the orderly and efficient conduct of its business, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the “Guidance Note”) and the Standards on Auditing prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether internal financial controls with reference to financial statements of the Company were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the internal financial controls with reference to financial statements of the Company and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the standalone financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A Company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Annexure "B" to the Independent Auditor's Report

I Significant Accounting Policies

a) Revenue Recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government.

Sales are disclosed inclusive of excise duty, but net of sales returns, service tax, value added tax, central sales tax and Goods and Service Tax(GST).

Revenue from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually on delivery of the goods. Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates.

Income from operations includes revenue earned on account of job work income and rent income which is accounted as per the terms agreed with the customers, Export benefits available under prevalent schemes are accounted to the extent considered receivable.

Notes

NOTES FORMING PART OF FINANCIAL STATEMENTS

Revenue from Real Estate Projects is recognized based on sold areas as per the percentage completion method. The stage of completion is determined as per the proportion of the cost of construction and development actually incurred till reporting date and the total estimated cost of construction and development of the project. The total estimated cost of the project is estimated based on the technical and other estimates of saleable areas, costs, etc. The estimates of costs are revised periodically by the management. The effect of such changes to estimates is recognized in the period such changes are determined.

Lease income is recognised in the Statement of Profit and Loss on straight line basis over the lease term, unless there is another systematic basis which is more representative of the time pattern of the lease. Revenue from lease rentals is disclosed net of indirect taxes, if any.

Revenue from Project Management and Consultancy services is recognized based on the terms and conditions set out in the agreement executed with the service receiver. The revenue is based on one or both of the following components; i.e., at a fixed percentage of total invoicing done by the service receiver and a fixed percentage of the total direct and indirect expenses incurred by the service receiver.

Income from Sale of Wind Operated Power is accounted on accrual basis on confirmation of units generated and supplied to the State Electricity Board as per the agreement.

Other income is comprised primarily of interest income, dividend income, gain / loss on investments and exchange gain/loss on foreign currency transactions. Interest income is recognized using the effective interest method. Dividend income is recognized when the right to receive payment is established.

b) Foreign Currency Transactions

Transactions in foreign currencies are initially recorded by the Company at the rate of exchange prevailing on the date of the transaction.

Monetary assets and monetary liabilities denominated in foreign currencies remaining unsettled at the end of the year are converted at the exchange rate prevailing on the reporting date.

Differences arising on settlement or conversion of monetary items are recognised in Statement of Profit or Loss.

Foreign exchange differences regarded as an adjustment to borrowing costs are presented in the Statement of Profit and Loss, within finance costs. All other foreign exchange gains and losses are presented in the Statement of Profit and Loss on a net basis within other gains/(losses).

c) Employee Benefits

(i) Defined Benefit Obligation Plans:

Gratuity

The Company operates a defined benefit gratuity plan which requires contributions to be made to a separately administered fund by the Life Insurance Corporation of India (LIC) and HDFC Standard Life Insurance Company Limited.

The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method.

The service cost and the net interest cost are charged to the Statement of Profit and Loss. Actuarial gains and losses arise due to remeasurement as result of the actual experience and the assumed parameters and changes in the assumptions used for valuation are recognised in the Other Comprehensive Income (OCI).

Provident Fund

The Company's contribution to provident fund, administered through a Company managed trust, is recognised as an expense in the Statement of Profit and Loss.

Notes

NOTES FORMING PART OF FINANCIAL STATEMENTS

Compensated absences

The Company has a policy to allow accumulation of leave by employees up to certain days. The excess leave will either be encashed or funded by the Company to LIC for and on behalf of employees. Accordingly, the excess leave liability is discharged by the Company upon such funding to LIC. Remaining accumulated leave liability (other than sick leave) as at the year end is provided as per actuarial valuation. Accumulated sick leave is provided for at actual in the Statement of Profit and Loss.

The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method.

Actuarial gains and losses arise due to difference in the actual experience and the assumed parameters and also due to changes in the assumptions used for valuation. The Company recognizes these actuarial gains and losses in the Statement of Profit and Loss, as income or expense.

(ii) Defined Contribution Plan:

Superannuation fund is administered by the HDFC Standard Life Insurance Company Limited. The contribution to Superannuation fund, Contribution to pension fund, ESIC and Labour Welfare Fund are recognised as an expense in the Statement of Profit and Loss.

d) Property, Plant and Equipments

Property, plant and equipments are recorded at cost of acquisition / construction less accumulated depreciation and impairment losses, if any. Cost comprises of the purchase price net of creditable Cenvat, Service Tax, Value Added Tax/Goods and services tax if any, and any attributable cost of bringing the assets to its working condition for its intended use.

Spare parts are treated as capital assets when they meet the definition of property, plant and equipments. Otherwise, such items are classified as inventory.

Any gains or losses on their disposal, determined by comparing sales proceeds with carrying amount, are recognised in the Statement of Profit or Loss.

e) Assets held for sale

Assets held for sale are measured at the lower of carrying amount or fair value less costs to sell. The determination of fair value less costs to sell includes use of management estimates and assumptions. The fair value of the assets held for sale has been estimated using valuation techniques which includes unobservable inputs.

f) Investment Properties

Property that is held for long-term rental yields or for capital appreciation or both, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised. Investment properties are depreciated using the straight-line method over their estimated useful lives. Though the Company measures investment property using cost based measurement, the fair value of investment property is disclosed in the notes. The Company has used government registration rates for the purpose of determining fair value of Land and Buildings.

g) Depreciation / Amortisation on Property, Plant & Equipments and Investment Properties

Depreciation on property, plant & equipments and investment properties is provided on Straight Line Basis as per the useful life prescribed in schedule II of the Companies Act 2013. Depreciation on these assets have been provided on the net restated book value prospectively over the remaining useful life as per Schedule II of Companies Act 2013. Freehold land is not depreciated.

Notes

NOTES FORMING PART OF FINANCIAL STATEMENTS

h) Capital Work-in-Progress

Projects under construction wherein assets are not ready for use in the manner as intended by the management are shown as Capital Work-In-Progress.

i) Leases**(i) As a lessee**

Leases in which a significant portion of the risks and rewards of ownership are not transferred to the Company as lessee are classified as operating leases. Payments made under operating leases are charge to profit / loss accounts as are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

(ii) As a lessor

Lease income from operating leases where the Company is a lessor is recognised in income on transaction value as the lease receipts are structured to increase in line with expected general Inflation to compensate for the expected inflationary cost increases. The respective leased assets are included in the balance sheet as investment property.

j) Fair Value Measurement

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

k) Impairments of Non-Current Assets

Non-financial assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the CGU to which the asset belongs.

If such assets are considered to be impaired, the impairment to be recognized in the Statement of Profit and Loss is measured by the amount by which the carrying value of the assets exceeds the estimated recoverable amount of the asset. An impairment loss is reversed in the Statement of Profit and Loss if there has been a change in the estimates used to determine the recoverable amount. The carrying amount of the asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

l) Inventories

All Inventories are valued at the lower of cost and net realisable value.

Raw materials, Stores and Spares and Packing Materials are valued at lower of cost determined on weighted average basis and net realisable value.

Work in process is valued at cost plus appropriate share of labour and manufacturing overheads.

Finished Goods are valued at cost plus appropriate share of labour, manufacturing overheads and excise duty thereon.

Construction work in progress is valued at cost and net realisable value whichever is lower. The cost is determined considering proportionate, cost of value of land, direct construction cost, development expenses and attributable indirect expenses.

Notes

NOTES FORMING PART OF FINANCIAL STATEMENTS

m) Trade Receivables

Trade receivables are carried at original invoice amount less any provisions for doubtful debts. Provision for allowances are made where there is evidence of a risk of non-payment, taking into account ageing, previous experience and general economic conditions. When a trade receivable is determined to be uncollectable it is written off, firstly against any provision available and then to Statement of Profit and Loss Account.

n) Cash and Cash equivalents

Cash and cash equivalents include cash at bank and cash in hand and highly liquid interest-bearing securities with maturities of three months or less from the date of inception/acquisition.

Cash flow statement

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from the operating, investing and financing activities of the Company are segregated.

In the cash-flow statement, cash and cash equivalents are shown net of bank overdrafts, which are included as current borrowings in liabilities on the balance sheet.

o) Borrowing Costs

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

p) Taxation**i) Current Income Tax**

Income tax expense comprises of current tax and deferred tax. Income tax expense is recognized in the statement of profit and loss except to the extent that it relates to items recognized directly in equity/OCI, in which case it is recognized in other comprehensive income. Current income tax for current and prior periods is recognized at the amount expected to be paid to or recovered from the tax authorities, using the tax rates and tax laws that have been enacted or substantively enacted on the reporting date.

The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously

ii) Deferred Tax

Deferred income tax assets and liabilities are recognized for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

The benefit of credit against the payment made towards Minimum Alternate Tax (MAT) for the earlier years is available in accordance with the provisions of the section 115J (AA) of income tax act 1961

Notes

NOTES FORMING PART OF FINANCIAL STATEMENTS

over the period of subsequent 15 assessment year and it is recognised to the extent of probability of its utilization in future and to the extent of Deferred Tax Liability (DTL).

q) Financial Instruments

The Company recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument.

(i) Financial Assets

(a) Initial recognition and measurement

All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date i.e, the date that the Company commits to purchase or sell the asset.

(b) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in three categories:

- **Financials Assets at Amortised Cost**

A financial asset is subsequently measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, debt instruments at amortised cost are subsequently measured at amortised cost using the effective interest rate method, less impairment, if any.

- **Financial assets at fair value through Other Comprehensive Income**

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- **Financial assets at fair value through Profit or Loss**

Financial assets which are not classified in any of the above categories are subsequently fair valued through profit or loss.

(c) De-recognition

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for de-recognition under Ind AS 109.

(d) Impairment

The Company recognizes loss allowances using the Expected Credit Loss (ECL) model for the financial assets which are not fair valued through Profit and Loss / OCI. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognised is treated as an impairment gain or loss in Statement of Profit and Loss.

NOTES FORMING PART OF FINANCIAL STATEMENTS

(ii) Financial Liabilities**(a) Initial recognition and measurement**

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts and derivative financial instruments.

Financial liabilities are classified, at initial recognition, as at fair value through profit and loss or as those measured at amortised cost.

(b) Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

- Financial liabilities at fair value through Profit and Loss

Financial liabilities at fair value through profit and loss include financial liabilities held for trading. The Company has not designated any financial liabilities upon initial recognition at fair value through profit and loss.

- Financial liabilities measured at Amortised Cost

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using the effective interest rate method except for those designated in an effective hedging relationship.

(c) De-recognition

A financial liability (or a part of a financial liability) is derecognized from the Company's balance sheet when the obligation specified in the contract is discharged or cancelled or expires.

r) Segment reporting

Operating Segments are identified based on monitoring of operating results by the Chief Operating Decision Maker (CODM) separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss of the Company.

s) Provisions, Contingent liabilities and Assets**(i) Provisions:**

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement.

(ii) Contingent Liabilities:

Contingent liability is disclosed for (i) Possible obligations which will be confirmed only by the future events not wholly within the control of the Company or (ii) Present obligations arising from past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.

(iii) Contingent Assets:

Contingent Assets are not recognised but are disclosed in the notes to the financial statements.

t) Earnings Per Share

Basic earnings per equity share are computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share are computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

1.5 Key Accounting Judgments, Estimates and Assumptions

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expense. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Any change in these estimates and assumptions will generally be reflected in the financial statements in current period or prospectively, unless they are required to be treated retrospectively under relevant accounting standards.

2 Recent Accounting Pronouncements:**Ind AS 115. Revenue from contracts with Customers**

The fair value of all equity instruments which are traded in the stock exchanges is valued using the closing price as at the reporting period. The mutual funds are valued using the closing NAV.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

There are no transfers between levels 1 and 2 during the year.

The Company's policy is to recognise transfers into and transfers out of fair value hierarchy levels at the end of the reporting period.

ii) Valuation technique used to determine fair value

Specific valuation techniques used to value financial instruments include:

- the use of quoted market prices or dealer quotes for similar instruments
- the fair value of the remaining financial instruments is determined using discounted analysis

Meaning of Internal Financial Controls over Financial Reporting

A Company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company’s assets that could have a material effect on the financial statements.

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments and mutual funds that have quoted price. The fair value of all equity instruments which are traded in the stock exchanges is valued using the closing price as at the reporting period. The mutual funds are valued using the closing NAV.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

There are no transfers between levels 1 and 2 during the year.

The Group's policy is to recognise transfers into and transfers out of fair value hierarchy levels at the end of the reporting period.

ii) Valuation technique used to determine fair value

Specific valuation techniques used to value financial instruments include:

- the use of quoted market prices or dealer quotes for similar instruments
- the fair value of the remaining financial instruments is determined using discounted analysis

v) Valuation Processes

Valuation of unquoted equity shares/preference shares is done by an external valuation agency.

The main level 3 inputs for unlisted equity securities used by the Group are derived and evaluated as follows:

Discount rates are determined using a capital asset pricing model to calculate a pre-tax rate that reflects current market assessments of the time value of money and the risk specific to the asset.

Earnings growth factor for unlisted equity securities are estimated based on market information for similar types of companies.

Changes in level 2 and 3 fair values are analysed at the end of each reporting period.

Notes

NOTES FORMING PART OF CONSOLIDATED FINANCIAL STATEMENTS

a. Credit Risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers, loans and investments. Credit risk is managed through continuous monitoring of receivables and follow up for overdues.

Investments

The Group limits its exposure to credit risk by generally investing in liquid securities and only with counterparties that have a good credit rating. The Group does not expect any losses from non-performance by these counter parties, and does not have any significant concentration of exposures to specific industry sector or specific country risks.

Trade Receivables

The Group has used expected credit loss (ECL) model for assessing the impairment loss. For the purpose, the Group uses a provision matrix to compute the expected credit loss amount. The provision matrix takes into account external and internal risk factors and historical data to credit losses from various customers.
